## Nectre Wood Fired Bakers Ovens

### Combination Radiant Cook Stove / Heater

Nectre Wood Fired Ovens combine the benefits of a powerful heating solution, with the functionality of a common cooking range and the enriched flavors of home cooked comfort food. Proudly Australian designed and manufactured with more than 40 years of knowledge and expertise in the wood heating business.

#### How Nectre stoves work

Hot flue gases circulate around the oven box to provide excellent cooking temperatures to bake a loaf or succulent roast or a favourite stew. The gases are then expelled through the Flue outlet. The bypass damper allows the Oven to function as an excellent wood heater when cooking is not required.
