Homeowners all over the country have come to realize the allure of fire in their backyards. American Fyre Designs™ fireplaces, firetables, fire bowls, and fire pits are available in a variety of styles, colors, and textures to complement any décor. Each product is crafted from innovative glass fiber reinforced concrete (GFRC). GFRC derives its strength from alkali-resistant glass fiber and acrylic polymer that results in durable concrete to withstand the outdoor elements. OUTDOOR KITCHEN CONSIDERATIONS

- Provide ventilation in island for gas vapors to escape. Allow at least four ventilation openings (two at floor level and two 16" above floor 10 in² each) at opposing ends/sides
- · Carefully consider grill size & accessories needed
- · Combustible construction requires insulating liner
- · Select Natural or Propane (LP gas)
- · Determine total gas consumption for supply line size
- · Access is required to gas connections and shut off valve
- · Plan location of propane tank away from grill and appliances
- Always refer to the installation and operating instructions of your Fire Magic® grill and/or accessories for installation guidelines & safety warnings, before starting your project
- · Always check all gas connections for leaks

LOCATION

- · Identify outdoor area where grill will be installed
- Determine the utilities needed (gas, water, electricity, drainage, etc.)
- Consider element exposure (sun, wind direction*, weather, etc.)
 Wind blowing into or across the rear oven lid vent can cause poor performance and/or dangerous overheating. Orient the grill so that the prevailing wind blows toward the front of the grill.

MATERIALS

- · Foundation concrete
- Base brick, stone, stucco, concrete
- · Counter-top tile, granite, marble, concrete

Notes

- 1. There is a hanger on three sides of each grill. You must allow clearance for the hanger (SEE DETAIL 1).
- The control panel (face) of the grills is wider than the cutout width. This conceals the cutout space on the left & right hand sides.
- 3. Clearance of 10" on each side of the oven is recommended for unrestricted operation of lid and rotisserie and at least 3" at the rear flange for ease of maintenance and proper operation. (18" from combustible surroundings on each side and rear is required)
- 4. Insulating liners must be used & are available for combustible surrounds (See page 6).
- 5. The rotisserie motor on all models is located on the right side of the grill. Optional Reverse Brackets are available to mount rotisserie motor on opposite side. ONLY units ordered with back burner option come with rotisserie kit and brackets.

The control panel is designed to sit flush against the enclosure front wall. If the enclosure counter-top extends beyond the front wall, creating a counter-top overhang, it must be cut flush with the front wall for the width of the control panel or a gap will be created exposing the forward portions of the left and right side grill fire walls.
