R600

FEATURES

DESIGNED FOR THE SERVICEMAN

Installations & Adjustments

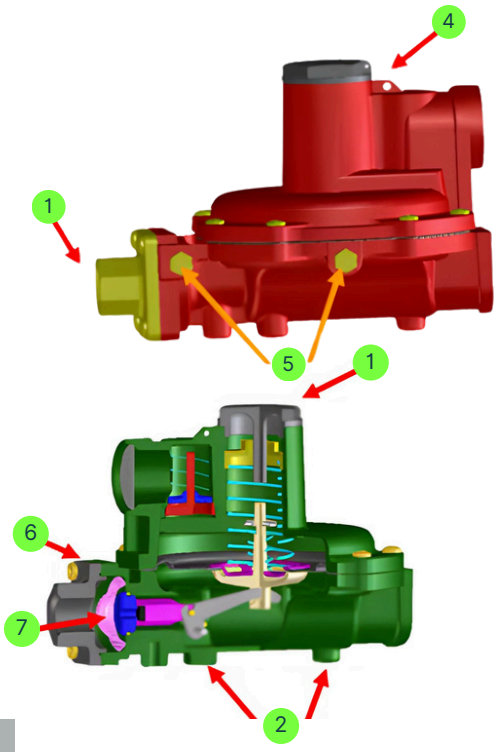

- Large Accessible Wrench Flats (1)
- Fits Universal Mounting Brackets (2)
- UV Closing cap with wrench flat allowing ease of adjustment (3)
- Spring adjustment protection (4)
- Labels ship in triplicate for ease and error-free documentation after install

Troubleshooting

- Inlet and outlet gauge taps for system tests (5)

Durability

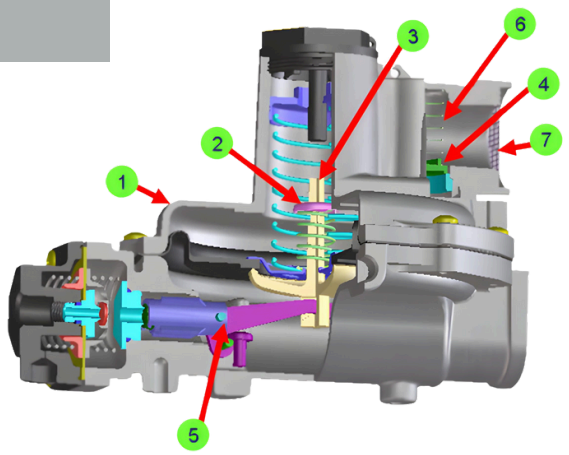

- Four Bolt, O-ring sealed inlet - Eliminates inlet leakage during installation (6)
- Inlet Screen in 2nd stage reg. - Keeps disc clean ensuring good lock-up (7)

FEATURES

DESIGNED FOR LONGEVITY

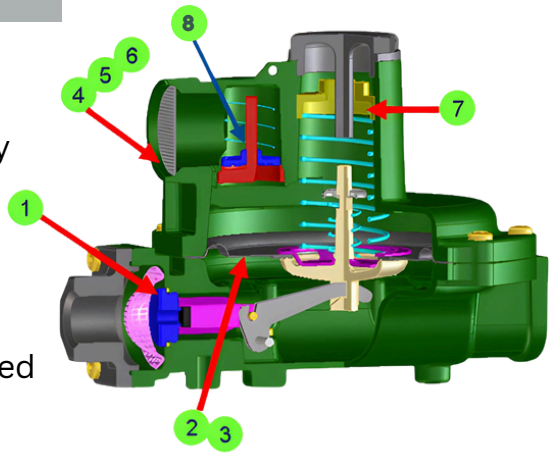

1. Corrosion Resistant Coating
2. SST Relief Valve Spring and Retainer
3. Non-Corroding Pusher Post & Relief Valve Seat
4. Non-Corroding Vent Flapper & Flapper Guide
5. SST Lever Pin
6. SST Vent Spring
7. SST Vent Screen

FEATURES

DESIGNED FOR PERFORMANCE

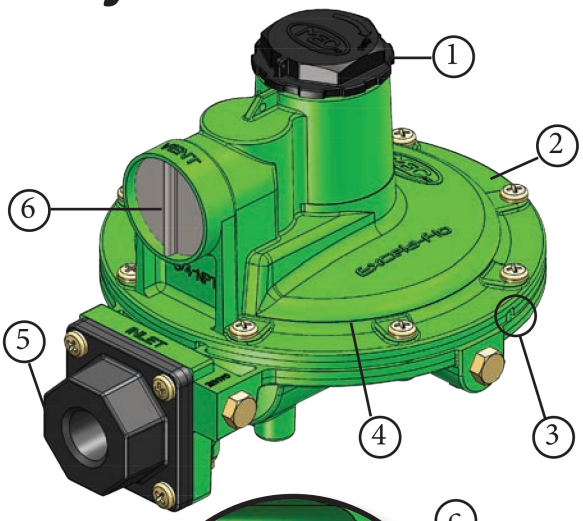

1. Durable Aluminum Orifice
2. Large Diaphragm for Increased Accuracy
3. Integrally Molded, Fabric Reinforced Diaphragm for Durability
4. Large 3/4"NPT Vent
5. Positive Spring Case Drainage
6. Large Drip Vent
7. Adjustable Spring Range
8. Integrally Mounted Stabilizer to Retain Stability if Vent is Closed

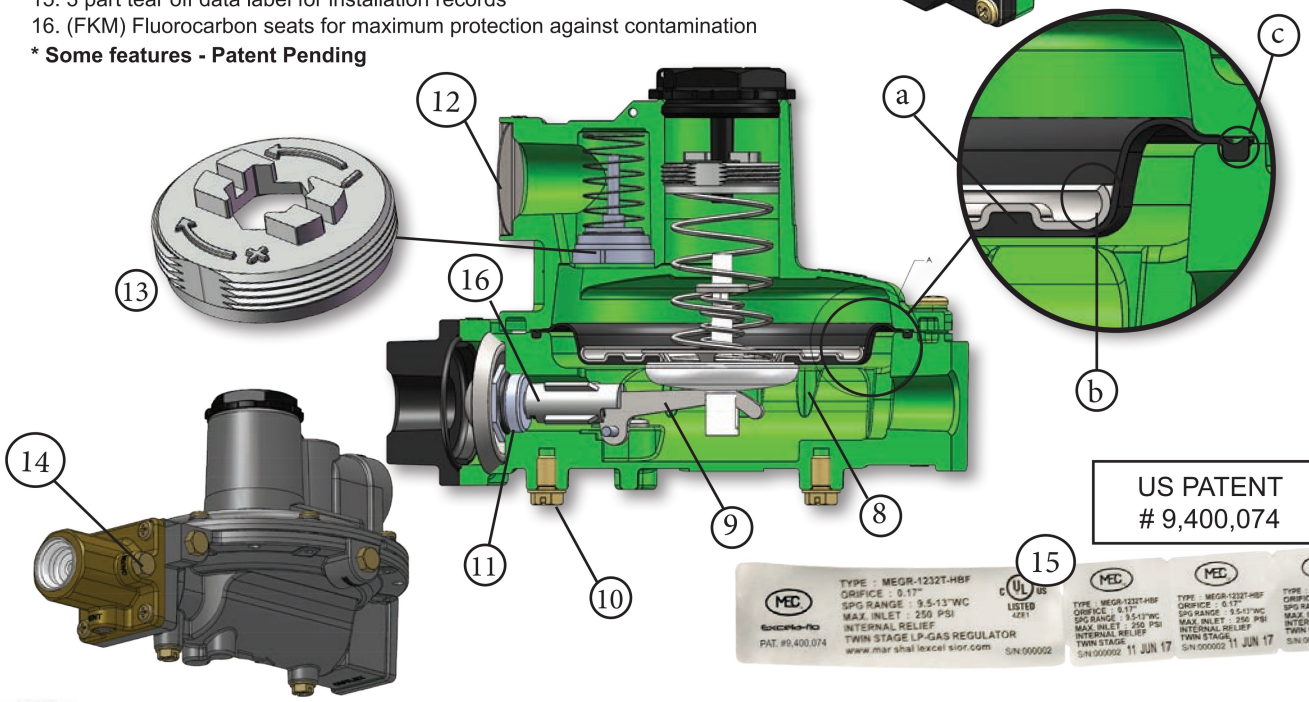

Exclusive Features and Benefits

1. Dust cap with hex and finger grips
2. Full round flange for evenly distributed compression
3. Locating tabs
4. Premium powder coat inside and out
5. Large wrench flats
6. Ribbed vent screen for easy removal
7. Fabric reinforced molded diaphragm
   a. Interlocking diaphragm and diaphragm plate.
   b. Rounded edges on diaphragm plate
   c. Sealing and locating bead on diaphragm
8. Travel stops - to prevent damage to diaphragm
9. Stainless steel lever design
10. Pre-installed mounting screws for installation convenience
11. Large aluminum orifice
12. Large drip vent
13. Adjustment direction indicator
14. Plugged high pressure gauge port on all integral two stage regulators
15. 3 part tear off data label for installation records
16. (FKM) Fluorocarbon seats for maximum protection against contamination

*** Some features - Patent Pending**

SENTINEL DIELECTRIC INLET CONSTRUCTION

1. Mounting Screws
2. Reinforcement Plate
   a. distibutes mounting screw loads across plate
   b. drip-lip to prevent water and condensation collection
3. Dielectric Isolator Plate and Cover
   a. plate and cover install over the inlet flange to electrically insulate the inlet piping from the piping system that enters the building
   b. plate is designed to isolate the mounting screws from the inlet
4. Dielectric 3/4" FNPT Flange Fitting
5. Double o-ring seal to prevent propane leaks

RegO Regulator Designs

RegO LP-Gas Regulators have been designed to give outstanding performance and dependability with a minimum of maintenance.

Nozzle Orifice
Replaceable and precision machined to prevent scoring of the seat disc.

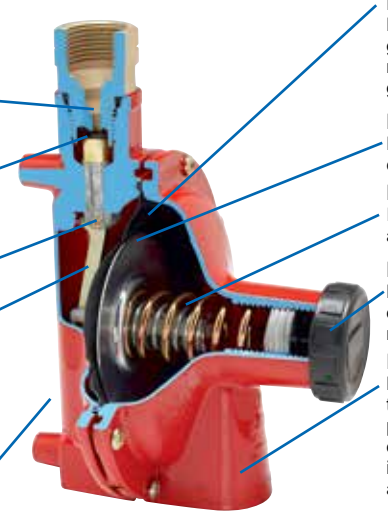

Seat Disc
Replaceable, resilient construction gives sure closing at lock up pressure. Straight line seat disc to nozzle operation provides even seat disc wear and positive lock up.

Pivot Pin
Fully enclosed in regulator body.

Control Linkage
Provides quick response to diaphragm movement; moves directly perpendicular to nozzle orifice to meter gas flow, gives positive closure and reduces seat disc wear.

Built-In Pressure Tap
Provides a convenient way to check downstream pressure on both high and low pressure models.

Body & Bonnet
Painted, heavy-duty zinc resists corrosion and gives long-life protection, even under "salty air" conditions.

Molded Diaphragm Assembly
Molded synthetic rubber with a tough, flexible fabric gives a super sensitive response in a temperature range of -40˚ to +165˚F. Molded diaphragm seals in a groove between the body and bonnet.

Diaphragm Plate
Rigid diaphragm plate transmits pressure variations to control linkage.

Relief Valve
It is built in and tamper resistant. Large bonnet vent allows high capacity relief on second stage regulators.

Bonnet Cap
Bonnet cap incorporates travel stop to help control downstream pressure in the unlikely event of a regulator malfunction.

Large Bonnet Vent
Large vent is equipped with protective screen and threaded for ¾" F. NPT vent piping. Large vent helps prevent ice from building up and blocking the vent during inclement weather. The regulator should be installed with vent down and the vent protected against blockage.

Laser Engraved Bonnet
New bonnet design features laser- engraved information that is easy to see and matches available stickers for gas check and record keeping. *Patent Pending

Easy to Turn Adjusting Screw
We redesigned our adjusting screw to be easily turned.

⅛" pressure plug ports
Our ⅛" pressure plug ports conform to 7/16" hex wrenches.

A

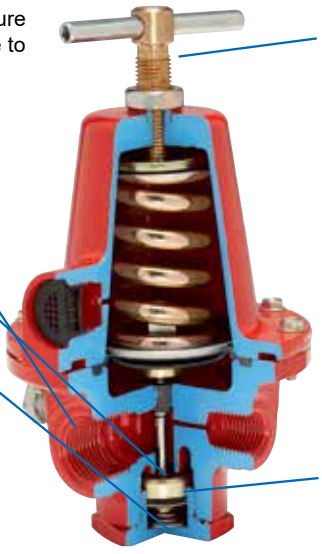

Typical of the 1580™ Industrial High Pressure Regulators

The pounds-to-pounds, industrial regulator gives higher delivery pressure as tank pressure decreases, thus permitting full use of the gas in the tank. Most units are field adjustable to meet changing conditions.

Connections
Machined and threaded into the body forging; also includes ¼" NPT pressure gauge ports.

Seat Disc
Synthetic rubber assembly attached directly to the diaphragm assembly to ensure proper movement and regulation.

Back Cap Spring
Provides added upward force to help provide a positive lock-up.

Adjusting Assembly
Large handle with lock-nut release allows easy resetting of delivery pressure.

Integral O-Ring
Minimizes tendency to vibrate or hum under extreme loads.

Sensitivity

In those cases where there is a choice of delivery pressure ranges, the **lowest** spring range which will fulfill your requirements is recommended because the sensitivity of a regulator decreases as the range of the adjusting spring increases.

Relief Valves

Most high pressure regulators are not equipped with integral relief valves. For certain applications where it is desirable to protect equipment downstream of the regulator, relief valves must be installed in the line.

NEW PRODUCTS

Shovel Barrier Underground Line Protector

- Integrated Tracer Wire
- Protects gas line w/ over 3900lbs breaking strength

NAVAC Automatic Flaring Tool

- Perfect flares instantly with the press of a button
- Battery powered, over 100 flares on a single charge
- Flares tubing sizes 1/4" up to 3/4"

Norgas Regulators

- N5 series line regulators come coated for corrosion resistance, available in multiple sizes & configurations, high capacities, economical
- NGR series 2nd stage regulators are designed for use on generators, Generac preferred brand

PowerBlanket Electric Tank Heaters

- Increase vaporization, prevent freeze-up
- Configurations available for all tank sizes
- Easy to install, weather resistant
- Meets UL, CSA, CE standards
