Why Phoenix Grills? In a word...Versatility

DESIGN & CONSTRUCTION

- Proudly made in the USA
- Unique grilling technology allows you to grill, roast, steam & smoke while minimizing flare-ups
- Dual controls outperform most of our competition by providing a wider range of temperatures
- Cast aluminum constructed drip pan distributes heat more efficiently across the entire grilling surface
- The addition of an Infrared SearZone (Part #PFMGSEAR purchase separately) truly makes this a complete grilling station
- Easy-to-use but packed with advanced grilling features

WORRY-FREE CONFIDENCE

- Backed by one of the most comprehensive warranties in the industry
- Friendly and knowledgeable customer service specialists readily available for the lifetime of the grill

PRODUCT HIGHLIGHTS

- Stainless Steel construction is made to last
- Complete outdoor cooking system—no need to supplement with other grills for specialized grilling
- Straight forward grilling with all the additional quality features for the serious backyard griller
- ► Ships in one box!
- Dual burner system, along with our cast aluminum drip pan, allows for a wider range of temperatures so you can grill, roast, steam or smoke all in one grill.

FIREPLACES FIRE BOWLS FIRETABLES FIRE PITS

Homeowners all over the country have come to realize the allure of fire in their backyards. American Fyre Designs™ fireplaces, firetables, fire bowls, and fire pits are available in a variety of styles, colors, and textures to complement any décor. Each product is crafted from innovative glass fiber reinforced concrete (GFRC). GFRC derives its strength from alkali-resistant glass fiber and acrylic polymer that results in durable concrete to withstand the outdoor elements. Modular construction makes these easy-to-assemble components fit readily into most backyards.

LAVA ROCK ONLY

When using lava rock, use enough to cover entire burner. Do not over-fill. Just use enough to hide the burner from view.

LAVA ROCK & LAVA STONES

In order to use lava stones, you must lay down a layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your lava stones and lay it on top of the lava rock and burner. The lava stones should only be one layer thick, just enough to cover the burner.

LAVA ROCK & GLASS

In order to use glass, you must lay down a layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your glass and lay it on top of the lava rock and burner. The glass should only be 3/4" to 1"thick, or just enough to cover the burner.

LAVA ROCK & LAVA BOULDERS

In order to use lava boulders, you must lay down a bottom layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your lava boulders and lay it on top of the lava rock and burner. Lava boulders are 6' to 12' in diameter.

MEC Gas Box (High Pressure)

APPLICATION

Utilizes standard LP Gas outdoor appliance regulator and connector. Both models provide full capacity operation at 10 PSI or higher inlet pressure for all outdoor appliances without modification or the hassles of a 20 lb. cylinder. Simply thread the Type 1 QCC or POL connector onto the MEC Gas Box, turn on the shutoff valve, and enjoy continuous LP Gas flow.

FEATURES

- Universal 1 5.16" M. ACME/F. POL Outlet
- Primary Shutoff Valve for each Outlet Connection
- For use with 0-350 PSI Inlet Pressure
- Universal Mounting Hardware
- Weather Resistant Nylon Case

- Universal 1/2" FNPT Inlet Connection
- Secondary Safety shutoff Poppet at each Outlet for Zero Discharge at Disconnect
- Hinged Cover with Latching Mechanism

ISLAND COUNTER-TOP OVERHANG

The control panel is designed to sit flush against the enclosure front wall. If the enclosure counter-top extends beyond the front wall, creating a counter-top overhang, it must be cut flush with the front wall for the width of the control panel or a gap will be created exposing the forward portions of the left and right side grill fire walls.

OUTDOOR KITCHEN CONSIDERATIONS

- · Carefully consider grill size & accessories needed
- · Combustible construction requires insulating liner
- Select Natural or Propane (LP gas)
- Determine total gas consumption for supply line size
- · Access required to gas connections and shut off valve
- Plan location of propane tank away from grill and appliances
- Always refer to the installation and operating instructions of your American Outdoor Grill® and/or accessories for installation guidelines & safety warnings before starting your project
- · Always check all gas connections for leaks
- Provide ventilation in island for gas vapors. Allow at least four ventilation openings (two at floor level and two 16" above floor. 10 in² each) at opposing ends/sides

LOCATION

- · Identify outdoor area where grill will be installed
- Determine the utilities needed (gas, water, electricity, drainage, etc.)
- Consider element exposure (sun, wind direction, weather, etc.)

MATERIALS

- · Foundation concrete
- · Base brick, stone, stucco, concrete
- . Counter top tile, granite, marble, concrete

Allow minimum of 5 1/2" clearance from the grill's rear edge (6 1/4" from cutout) to the backsplash to allow the hood to fully open.

Warranty Reference Guide

Warranty Claim Process: To ensure the proper warranty processing and to help expedite your claim please be able to provide RMI Customer Service and/or Technical Support with the <u>complete model and serial number</u> of the item. It is recommended that you contact RMI's Technical Support department before replacing any parts. For propane and natural gas related claims please be prepared to supply the inlet/outlet gas pressures when you call. To accurately troubleshoot and ensure the best outcome we recommended that you call our Technical Support department while you are in the field with the unit.

Refer to the manufacturers instructions manual for more information on the conditions, exclusions and procedures regarding the individual product warranty. This is just a guide. Subject to change.
